

THE WAVE[®]

IN A WORLD OF TRAILERS, TRAVIS LEADS

Travis Body & Trailer offers the Patented Wave®, Aerodynamic smooth-sided sidewall design on our end dump trailers, and several of our other trailer types. The lightweight Wave® features incredible strength and durability and can be applied to virtually any trailer configuration. Ideal for the bulk hauling industry, *Wave® trailers can handle a myriad of commodities including sand and gravel, coal, coke, industrial wastes, hazardous waste, asphalt, sludge, rendering, municipal solid waste, agricultural commodities, and more.*

BODY

- ★ Lengths 22 ft. – 42 ft.
- ★ Tapered body, 96" wide front to 102" wide at rear
- ★ 54" side height standard (48" to 90" available)

KEY FEATURES

The Wave® has been offered exclusively by Travis Body & Trailer, Inc. of Houston Texas since 2001. Travis is a top 30 trailer manufacturer in the USA.

- ★ The Wave® highlights Travis' distinctive look and appeal of the polished, wavy sides
- ★ The Patented Wave® dual-wall polished extrusions are made of stronger, longer lasting 6061-T6 aluminum extrusions
- ★ Thin walls add to capacity (only 2.75" from inner to outer surfaces)
- ★ Inner wall and internal stiffeners hide dents and dings on walls and gate
- ★ Travis' unique tapered body is standard (96" wide front, to 102" wide at rear)
- ★ Aerodynamic, fuel saving smooth sides, with opportunity for advertising message
- ★ Ease of cleaning and maintenance
- ★ Rounded ½" thick "bull-nose" top rail sheds material

WAVE® TRAILERS USE LESS FUEL, HAUL MORE PAYLOADS AND BENEFIT WITH EASY CLEANING AND MAINTENANCE – INCREASING PROFITS.
