Website**

Trusted Storage for Your Container

- Near Downtown St. Louis
- In the heart of one of the largest transportation hubs in the USA
- We have room to grow
- Trusted service since 1959

WE SWEAT THE DETAILS SO OUR CUSTOMERS CAN COUNT ON SECURE STORAGE

- Yes, we're quick but also thorough. If containers have significant dents, we always alert the customer in the intake report sent. Estimates are sent to customer the same day or at the latest, next day. When repairs are approved, we are quick to get things started and finished.
- We do not damage containers here. Containers only get better or stay the same when stored here. We want customers to know their equipment is safe once we receive it.
- We have room to grow. While not yet at full capacity, we can easily store 1,000 to 1,500 shipping containers, and still have room for chassis and truck parking as well.
- Our container depot has a full-service shop to perform minor repair work on-site, with extensive repairs handled in the River-Roads trailer shop located just a few minutes away in Granite City, IL.
